

## **Press Release For immediate Circulation**

1. Members of the Major Oil Marketers Association of Nigeria (MOMAN) are working with the regulatory Authorities and NNPC towards a resolution of the current fuel crisis.
2. MOMAN subject matter experts are active contributors to the technical and commercial committees' setup by the regulatory Authorities to re-stock fuel supplies, resolve the blending of contaminated product and identify losses suffered by customers, operators and third parties. MOMAN's committee of chemists are also working with designated laboratories to double check the quality of product (re-blended or new) before they are released into the fuels supply chain.
3. Most importantly, MOMAN members have committed resources towards enhanced operations and associated activities to reduce the burden of the current fuel scarcity to our customers. Towards this purpose, MOMAN members shall extend opening hours of jetties, depots, and filling stations to a minimum of 18 hours a day and where possible up to 24 hours a day in high density and flagship locations where the security situation permits.
4. MOMAN members shall operate these extended hours until the excessive queues subside.
5. MOMAN members urge its customers not to panic buy as it might take a few days for normalcy to return and panic buying increases the pressure on the supply chain.

**Olumide Adeosun  
Chairman, Major Oil Marketers Association of Nigeria**
